7. (Canceled)
8. (Canceled).
9. (Canceled)
10. (Canceled)
11. (Currently Amended) An organic light emitting diode (OLED) comprising an active layer comprising the polymeric composition of Claim 14 or Claim 18.
12. (Currently Amended) An electroluminescent device comprising an active layer comprising the polymeric composition of Claim 14 or Claim 18.
13. (Canceled)
14. (Original) A method for forming a polymeric composition comprising providing a plurality of aromatic monomers selected from fluorene, spirofluorene and bridged biphenyl;
treating the monomers with at least two reagents capable of adding substituents to the monomers, said substituents being independently selected from alkyl, heteroalkyl, alkenyl, heteroalkenyl, alkynyl, heteroalkynyl, aryl, heteroaryl, arylalkyl, and heteroarylalkyl, to form a mixture of randomly substituted monomers;
polymerizing said mixture of randomly substituted monomers to form a polymer.

16. Canceled
17. Canceled
18. (Canceled)
19. (Currently Amended) An electronic devices comprising at least one electroactive layer positioned between two electrical contact layers, wherein at least one electroactive layers of the device includes an electroluminescent layer comprising the polymeric composition of Claim 14 or Claim 18.
20. (Canceled)
21. (New) The method of Claim 14, wherein the monomers are treated with a mixture of alkylating agents having different alkyl groups.
